Fund Update

Kōura KiwiSaver Scheme : Strategic High Growth Fund

Fund Update for the quarter ended : 30 September 2026

This update was first made publicly available 29 October 2026

What is the purpose of this update?

This document tells you how the Kōura Wealth KiwiSaver Scheme Strategic High Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Kōura Wealth Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Fund invests in a range of assets to take advantage of both global and domestic investment opportunities. Its asset allocation is similar to a traditional aggressive fund.

Total value of the fund:	**$61,866,661**
Number of investors in the fund:	**5,253**
The date the fund started:	**9 December 2024**

What are the risks of investing?

Risk indicator for the Strategic High Growth Fund[1]:

Lower Risk Potentially Lower Returns							Higher Risk Potentially Higher Returns
1	2	3	4	***5***	6	7	

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at https://sorted.org.nz/guides/kiwisaver/kiwisaver-which-fund-suits/.

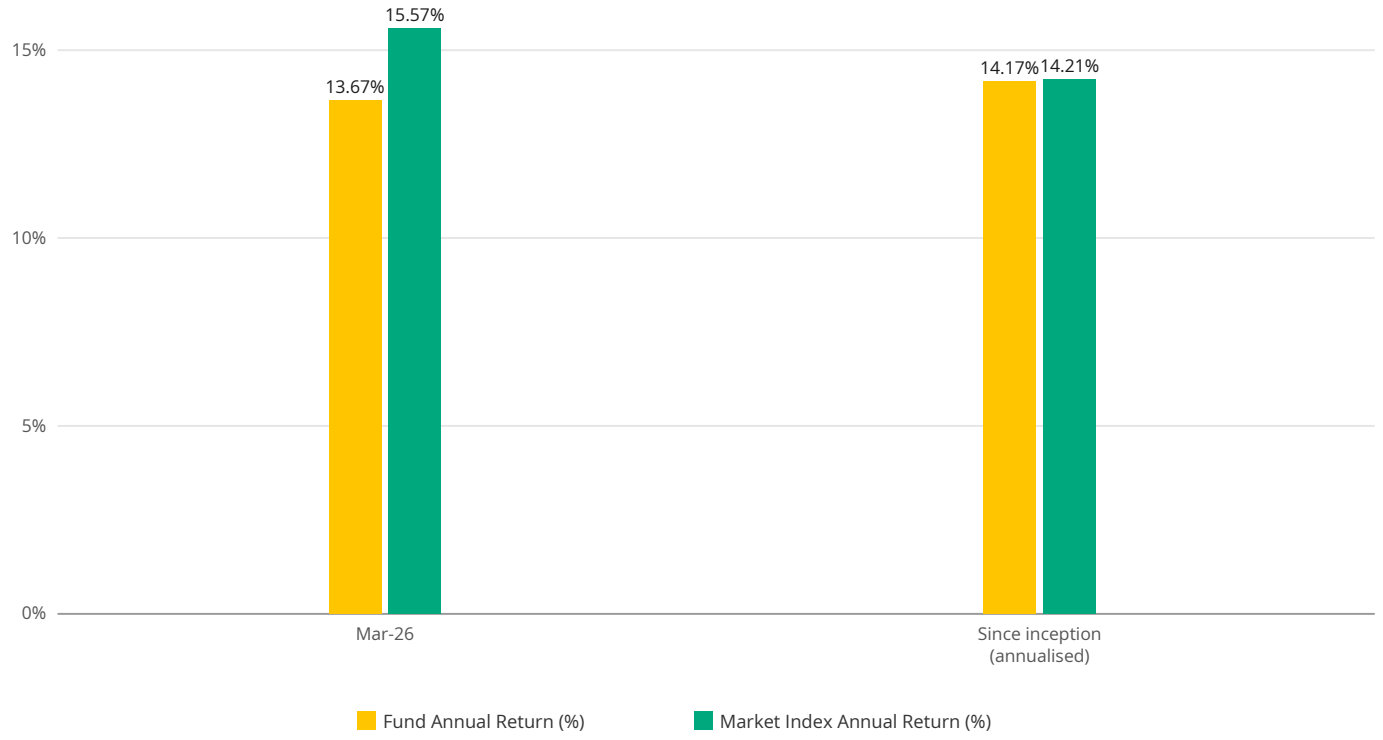

Note that even the lowest category does not mean a risk-free investment, and there may be other risks that are not captured by this rating. This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years ended 30 September 2026[1]. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past Year
Annual Return (After deductions for charges and tax)	**16.76%**
Annual Return (After deductions for charges but before tax)	**18.03%**
Market index annual return (Reflects no deduction for charges and tax)	**14.00%**

The market index return is made up of 5% in the Bloomberg NZ Bond Composite 0+Y index return, 15% in the Morningstar New Zealand Gross Return index return, 80% in the Morningstar Global Markets Index return (50% translated to NZD). The market index return reflects no deduction for charges and tax.

Annual return graph [2,3]

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the return since the fund started, up to 30 September 2026 on an annualised basis.

Important: This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) 28% tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.

What fees are investors charged?

Investors in the Strategic High Growth Fund are charged fund charges. For the year to 31 March 2026, these were:

	% of net asset value
Total Fund charges	**1.10%**
Which are made up of:	
Total Management and administration charges	**1.10%**
Including:	
Manager's basic fee	0.85%
Other Management and administration fees	0.25%
Total performance based fees	**0.00%**
Other charges	
Administration Fee	**$30 per year**

All fund charges are exclusive of GST.
Investors are not charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds).

Example of how this applies to an investor:

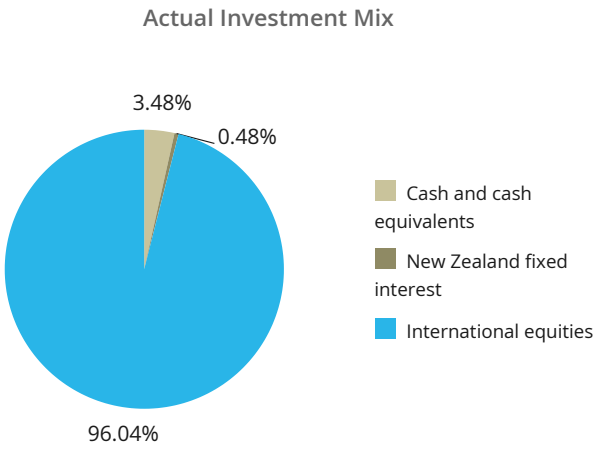

Small differences in fees and charges can have a big impact on your investment over the long term.
Lily had $10,000 in the fund at the beginning of the year and did not make any further contributions. At the end of the period, Lily received a return after fund charges were deducted of $1,676. (That is 16.76% of her initial $10,000). Lily also paid $30 in administration charges. This gives Lily a total return after tax and charges of $1,646 for the period.

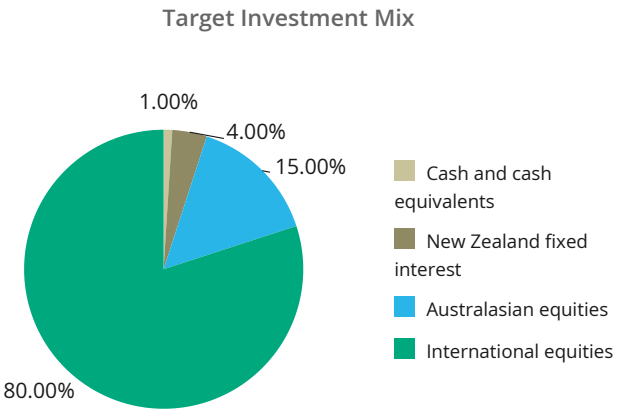

What does the fund invest in?

Notes

1. As the fund started on 9 December 2024, actual returns for the fund are not available until then. To calculate the risk indicator for the five-year period ending 30 September 2026, market index returns have been used up to 9 December 2024 with actual fund returns used for the balance of the period. As a result of those market returns, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. Performance has been calculated from 9 December 2024, when the first investment was made in the fund.
3. The bar chart show fund returns after the deduction of fees and taxes, however, the market index returns are shown before any fees or taxes are deducted.
